Fiscal Estimate Narratives COMM 10/13/2005

LRB Number	05-2365/1	Introduction Number	AB-703	Estimate Type	Original		
Subject							
Disallowing tax benefits and state contracts for companies that hire illegal aliens							

Assumptions Used in Arriving at Fiscal Estimate

Under AB-703, companies based in the United States that hire illegal aliens are no longer eligible to receive tax credits, property tax exemptions and grants or loans from the state or local units of government for a period of seven years. Further, these companies are barred, with certain exceptions, from entering into a contract with the state or any local unit of government to perform construction, re-modeling or repair work or to provide goods or services for a period of seven years.

The Department does not estimate that it could absorb the additional workload associated with this bill given current staffing levels. The Department anticipates it will need an additional 1.0 FTE Community Services Specialist position to administer the provisions of this legislation. According to U.S. Census records, Wisconsin has 102,566 firms that could potentially be affected by this bill, while the nation as a whole has 4,953,937 firms that could potentially be affected by AB-703.

The Department estimates that the workload generated by this bill will necessitate hiring a specialist that can serve as a point of contact for companies, state agencies, local units of government and state and local officials that have questions regarding this legislation. The incumbent will need to publicize the requirements of this legislation to ensure compliance. While it is not specifically required, the incumbent will likely need to maintain and update a listing of companies that are affected by this legislation. The Department will share this information with units of local government, as this legislation applies. The Department will also necessitate an increase in its supplies and services to account for mailing, telephone and IT-related costs. These amounts are estimated below.

The Department will need to update its forms to ensure that companies certify that they are not subject to these provisions before entering into an agreement with them. These costs may likely be absorbed by the Department and are not included in the below estimate of costs.

The annualized costs for an entry level Community Services Specialist position, which are detailed below, are currently \$48,900. The Department also anticipates one-time costs of \$7,000 for a computer, workstation and IT applications development.

1.0 FTE Community Services Specialist

Salary + Fringe: \$44,900 Supplies and Services: \$ 4,000 One Time Costs: \$ 7,000

Total annualized costs: \$48,900

It is unclear what effect this bill will have on local units of government. Under this bill, local units of government are prohibited from entering into contracts with companies affected under the provisions of AB 703. However, this bill does not require local units of government to verify that companies they do business with or make awards to are not affected by the provisions of this bill. Local officials may choose to verify that information by contacting the Department.

Long-Range Fiscal Implications
